WORK SUMMARY

SENIOR SOFTWARE DEVELOPER
GRAYBOX | Jan 2021 - Jan 2023
Promoted to Senior Developer in Sep 2022

GRAYBOX is a digital consulting agency that helps our partners solve challenges, reach their audience and optimize their operations with elegance, utility, and expertise.

- Design, problem solve, validate, estimate/breakdown, document, and build web and mobile applications.
  - For some examples see https://goldenchris.com/portfolio
  - *Typescript, React.js, Vue.js, React-Native, SCSS, Laravel, PHP, GraphQL, SQL, Symphony. Deployed to AWS Kubernetes (and google/apple stores) and developed using Docker.*
- Troubleshoot, test, and maintain the core product for existing and developed applications.
- Identify and escalate risks (budget, deadline, ambiguity, etc) to the project manager

CONTRACTED SOFTWARE DEVELOPER
Portland Urban Bee Keepers | Jan 2018 - August 2020

Created a web application that texts alerts of reported bee swarms to paid members, giving members a chance to claim, collect, and re-home bees.

- Architect and develop a widget plugin/Admin data management portal, api, and database for the Swarm Reporting tool.
  - *React, Node, Express, SQL, Antd, TypeScript, Twilio, and Stripe.*
  - *Deployed to a Linode server using self hosted CircleCI*
- Troubleshoot and fix client reported issues/bugs.

FULL STACK SOFTWARE DEVELOPER
SBI Software | March 2019 - March 2020

From UX/UI design to database design/management to application deployment, and everything in between, Developers at SBI do it all.

- Develop front-facing consumer applications using
  - *JavaScript, TypeScript, JQuery, React w/ Redux, Express, Node, and MSSQL.* Hosted on *Microsoft Azure*
- Design and implement databases using Microsoft SQL Server.
- Debug issues of all severity, from failed unit-tests to customer-found bugs, in unfamiliar and complex code.
- Work with Project Managers in an Agile work environment to simultaneously produce quality products and meet deadlines.

SPECIALIZATIONS

- *React.js*
- *Vue.js*
- *HTML*
