EXPERIENCE

GRAYBOX — Software Applications Developer

Jan 2021 - Present

GRAYBOX is a digital consulting agency that helps our partners solve challenges, reach their audience and optimize their operations with elegance, utility, and expertise.

- Work on a small team of developers to design, problem solve, validate, estimate/breakdown, and build web and mobile applications.
- Troubleshoot, test, and maintain the core product for existing and developed applications.
- Identify and escalate risks (budget, deadline, ambiguity, etc) to the project manager

SBI Software — Full Stack Software Developer

March 2019 - March 2020

From UX/UI design to database design/management to application deployment, and everything in between, Developers at SBI do it all.

- Develop front-facing consumer applications using JavaScript, TypesScript, JQuery, React w/ Redux, Express, Node, and MSSQL.
- Design and implement databases using Microsoft SQL Server.
- Debug issues of all severity, from unit test bugs to customer-found defects in unfamiliar and complex code and work directly with clients to identify and solve bugs and issues.
- Work with Project Managers in an Agile work environment to simultaneously produce quality products and meet deadlines.

Portland Urban BeeKeepers — *Contracted Software Developer*

November 2018 - March 2019 & April 2020 - August 2020

Created a web application that texts alerts of reported bee swarms to paid members, giving members a chance to claim, collect, and rehome bees.

- Architect and develop a widget plugin/Admin data management portal, api, and database for the Swarm Reporting tool.
- Troubleshoot and fix client reported issues/bugs

SBI Software — *Software Reports Manager*

October 2018 - March 2019

 SBI Software provides a suite of applications, both Web and Desktop, for big box Plant Nurseries to guide them from seed to sale. I managed a team that created customized Crystal Reports for clients, based on data in their DB.

- Communicate with clients about bugs and Custom Crystal Reports
- Manage the progress of projects and team
- Document/troubleshoot errors with reports
